(54) Title: **THREE DIMENSIONAL TOMOGRAPHIC FABRIC ASSEMBLY**

(57) Abstract: A method of making a fabric, by selective deposition modelling or fused deposition modelling, comprises feeding material from at least one nozzle onto a moveable belt (14). The nozzle (13) is moveable for translational movement and the spacing between the nozzle (13) and the belt (14) is adjustable. The flow through the nozzle (13) and translational movement of the nozzle (13) is controlled such that the nozzle (13) dispenses the material in a controlled manner to form the fabric layer-by-layer.
